REVISION THREE

P.5 - MATHEMATICS

nurture excellence for greatness

1. Add the numerals below

- i. $826 + 18$
- ii. 8,585 plus 9,871
- iii. Find the sum of 8,349 and 9,734

2. Calculate the total of 6279 and 5815

3. What number is got when 6859 is added to 58350?

4. A tank had 10000 litres of water and 2965 litres of the water were used, how much water was left in the tank?

5. i. Work out the product of 68 and 23.

ii. An ox has 4 legs, how many legs do 5 oxen have?

6. Mr. Magezi had 366 cows and shared them among Jane, Joy and Jeff, how many cows did each one get?

7. Work out the quotient got when 24 is divided by the divisor 4.

8. a) Work out

i. $-4 + +6 =$

ii. $6 - -1 =$

b) Draw number lines and use them to simplify the integers given below.

i. $+9 + -6$

ii. $-4 - +5$

iii. $+1 + +7$

iv. $-9 + 4$

v. $-3 - -2$

9. Work out the numbers below.

i. $52,689 + 685$

ii. $3,678 + 7,510$

iii. $6,383 \text{ eggs} + 10,000 \text{ eggs}$

- iv. Peter reared 29,550 goats and 5,369 goats were stolen from the farm, how many goats remained on the farm?
- v. Calculate the difference between 9,287 and 4,560.
- vi. What is 73,198 take away 9,540?

10. In a village, there are 9,510 men, 3,214 women and the rest are children.

- i. Find the number of children in the village.
- ii. What is the sum of the number of men and women in the village?
- iii. Work out the difference between the number of men and the number of women.

11. A business man deposited sh. 976,432 to his account in the bank and after two days he withdrew some amount of money and left only sh. 9,431 on his account. How much did he withdraw?

12. Find the number of months in 5 years if a year has 12 months.

13. 1m = 100 cm, how many metres are in 8000cm?

14. A building has 5 floors, how many rooms are in the building if each floor has 20 rooms?

15. Work out:

- i. $6 + 3 - 4$
- ii. $9 \times 1 + 3$
- iii. $12 \div (2 + 4)$
