

TRINITY COLEGE NABBINGO
ART AND DESIGN
SENIOR ONE M

INSTRUCTIONS: Read and analyze the activity in the topic below, afterwards attempt the activity of integration that follows. A hint or process guideline, picture examples and a video are attached

TOPIC: EXPLORING THE NATURAL ENVIRONMENT
ACTIVITY: COLLAGE

Collage is a technique of an art production, where the art work is created using an assemblage of different forms and shapes using different materials. The forms and shapes eventually create a whole image. They can be of different colors as well to make a more attractive piece of art

The word collage comes from a “French word *coller* meaning to ***glue or paste***” “collage is also an arrangement of several different shapes, cut or torn from various materials, which form a pleasing combination of shapes, textures and colours when glued onto a sheet of paper to make a permanent picture.” Obviously, then, collage art is made up of various collections of things. Nevertheless, working to produce a collage artwork is governed by serious creativity supported by “pasting” and “assembling.”

TASK/ QN

ACTIVITY OF INTEGRATION

Using a rigid surface of **30cm x 25cm** and wood glue, produce a collage with objects/ materials Collected from the surroundings. These objects should be arranged to form a pattern or composition of your choice

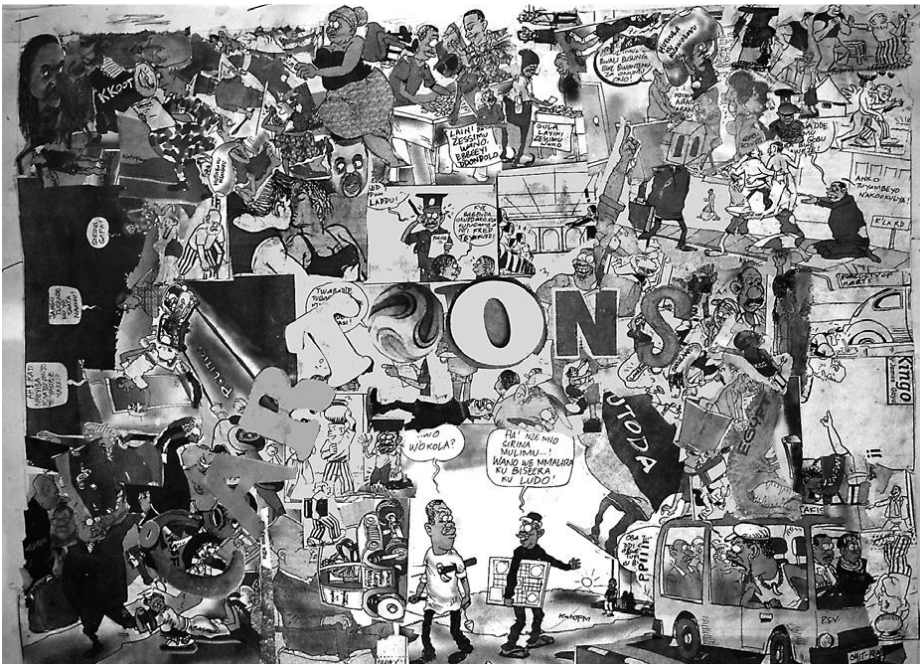

The objects/materials used on the collage should fit properly in the available space.
