SECTION A (30MARKS)

Choose the correct alternative.				
 Which one of the following is a reason drainage is carried out? A. soil acidity is reduced. B. There is controlled fungal diseases C. Soil temperatures are modified. D. There is increased availability of so 				
2. Cattle belongs to the family of Bovida A. They have a back bone.B. They hav C. They have hooves. D. T				
3. Which one of the following is the least up farm structures for livestock.A. Cost of the materials.C. Siting of the structure.4. The figure below shows the type of der	B. Durability of the materials D. Panorama of the structure.			
Price Dd P1 P2	Dd			
Q ₁ Q ₂ Q The type of demand illustrated is A. Elastic demand.B. Inelastic demand. C. Unitary demand D. Perfectly elastic de	emand.			
	nisms in an ecosystem is referred to as Trophic level D. Ecological pyramid.			

- 6. Phosphate fertilizers are applied by band placement because A. They are mobile. B. They are soluble.
- C. They are easily fixed. D. They easily get lost in gaseous form
- 7. Which one of the following is not an effect of oxytocin hormone in a cow?
- A. Promotion of milkletdown
- B. Facilitation of sperm transport up the uterus C. Induced labour during parturition.

D. Indule milk synthesis.	
8. Which one of the following statements does not apply to fixed costs in A. They are allocated to specific enterprise.B. They cannot be postponedC. Must be incurred even when there is no outputD. Do not change with the level of production.	n production?
9. Systemic pesticides are effective against pests because A. They are toxic to pestsB. They cover all parts of the plant C. They remain protected on the plantD. They repel pests from the plant.	
10. Which one of the following is a disadvantage of trees in Agroforestry A. Trees recycle nutrients from soil.B. Trees accumulate large quantities of nutrients in their structure.C. They lower soil temperature.D. They reduce on the effect of raindrops on the soil.	
11. In which parts of the animal body are the alveoli found? A. Udder and pancreas. C. Pancreas and lungs. B. Lungs and uccommod D. Udder and live.	
12. Which one of the following organisms are primary producers in a form.A. Plants and algae. B. Mammals and molluscus.C. Birds and algae.D. Bacteria and worms.	od chain
13. Marginal product refers toA. Product obtained from unit of input.B. Extra product obtained from extra unit of input.C. Output obtained from all the inputs used.D. Total output divided by total input.	
14. The figure below shows the parts of the plant	
a b c d	
Which portion can be used for propagation? A. b B. c C. d D. a	
 15. It is the advisable to feed mash rather than pellets in poultry mana because mash is A. More digestable than pellets B. More palatable than pellets C. Cheaper than pellets D. Prolongs the time for feeding 	gement

16. Which of the following is aA. Delayed maturity B. IC. Delayed flowering D. La	Hastened ma	aturity	crops	
17. Which one of the following plough that is frequently u A. Oiling moving partsB. Sharpening the digging pointsC. Replace wornout partsD. Apply antirust paint on the	sed? nt		important on an ox-	
18. Which one of the followingA. Mating becomes easier.B. It discourages breeding of the C. There is production of both D. It encourages faster growth	olow flies. Detter quality		leep?	
19. Which one of the following A. Potassium B. Ch	g minerals is nlorine	vital in the proce C. Sodium	ess of respiration? D. Phosphorus.	
20. Which of the following is a A. Transportation B. Sto	a facilitating orage	_		
21. Which of the following men production in low rainfall area A. Growing cover crops.B. Controlling weeds by cultive C. Covering the soil with or D. Burning all vegetation cover.	as? ration rganic mulch		serving water for cro	
22. Soil capillarity is due to the A. Cohesion. B. Adhesion		tic pressure. D.	Surface tension.	
A. Performance of each ent B. All transactions carried C. Financial position of the D. Income and expenditure	terprise on the factorial to the factorial term on a page of the factorial term on a page of the factorial term on the factorial term of the factorial ter	he farm arm throughout t particular date	he year.	
24. Which of the following occ falls?A. Fish swim to the bottomB. Fish swim to the water surf.C. Fish take in more waterD. Swimming activity of fish in	n of the pond face gasping to get oxyge	l	oncentration in a fish	pond
25. The minority of bees in a land A. Workers B. Drones		D. Stingless bee	es	
26. The following are reasonsA. Keeping birds busyB. Controlling pests and diseaC. Controlling cannibalismD. Providing vitamins to birds	ases 1.	green plants in a	poultry house except	

27. Scarification of seeds is done to;A. Protect them from soil borne diseasesB. Innoculate them.C. Allow easy germination.D. Improve on their storage life.	
28. Which of the following is not an adaptation of leaves for photosynthesis A. Broad lamina B. Numerous chloroplasts in palisade cells C. Airspaces between leaf cells. D. Thick lamina.	
29. Which one of the following is not fencing material? A. Wood B. Wire strainer C. Barbed wire D. Fencing nails	
30. Which of the following is the normal presentation of a calf at parturition A. Hind legs appear firstB. Hind legs and fore legs appear togetherC. Fore legs appear first with the headD. One foreleg appears first	
SECTION B (70MARKS)	
31(a). Describe any five factors that affect the choice of irrigation system to use 5mks
