2. Section **A** is compulsory and carries **20** marks.
3. Section **B** consists of **six** questions. Answer only **four** questions from this section.
4. All questions carry equal marks.
5. All answers to each question should begin on a fresh page.
6. **Do not** write on the question paper.
7. All answers and rough work should be written in the official answer booklet provided.
8. Read other instructions on the answer booklet.

SECTION A - (20 MARKS)

Answer all questions in this section.

Question One

- (a) Read the following direct quotation and complete the sentences that follow using tenses in reported speech.

Lydia said, "I have often used the internet to do research. Last year, I used google scholar to find out previous theses on the relationship between internal audit and financial performance of organizations. The website is very productive. I am also interested in latest clothing fashions, and I search the internet for information on the latest designs in Nigeria and the best clothing designs for my new project."

- (i) Lydia said that _____. (02 marks)
- (ii) She emphasized that _____. (02 marks)
- (iii) She stressed that _____. (02 marks)
- (iv) She also reported that _____. (02 marks)
- (v) Finally she state that _____. (02 marks)

- (b) Read the passage and answer the questions that follow.

"Apple Inc. plans to use a larger screen on the next-generation iPhone and has begun place orders for the new displays from suppliers in South Korea and Japan", people familiar with the situation said on Wednesday.

"The new iPhone screens will measure 4 inches from corner to corner", one source said. That would represent a roughly 30 percent increase in viewing area, assuming Apple keeps other dimensions proportional. Apple has used a 3.5 inch screen since introducing the iPhone in 2007.

Early production of the new screens has begun at three suppliers: Korea's LG Display Ltd, Sharp Corp. and Japan Display Inc., a Japanese government-brokered merger combining the screen production of three companies.

It is likely that all the three screen suppliers will get production orders from Apple and this could begin as soon as June, 2019. That would allow the new iPhone to go into production as soon as August, 2019 if the company follows its own precedent in moving from orders for prototypes for key components to launching original and genuine products. Apple's decision to equip the next iPhone with a larger screen represents part of a competitive response to Samsung Electronics Co. Ltd. Samsung unveiled its top-of-the line Galaxy smartphone with a 4.8 inch touch-screen and a faster processor earlier this month.

With consumers becoming more and more comfortable using smartphones for tasks they once performed on laptops, like watching videos, other smartphone manufacturers have moved towards bigger displays.

(Adopted from www.businessenglishsite.com)

Questions
